A Media Workflow Designed to Make A.I. Work For You

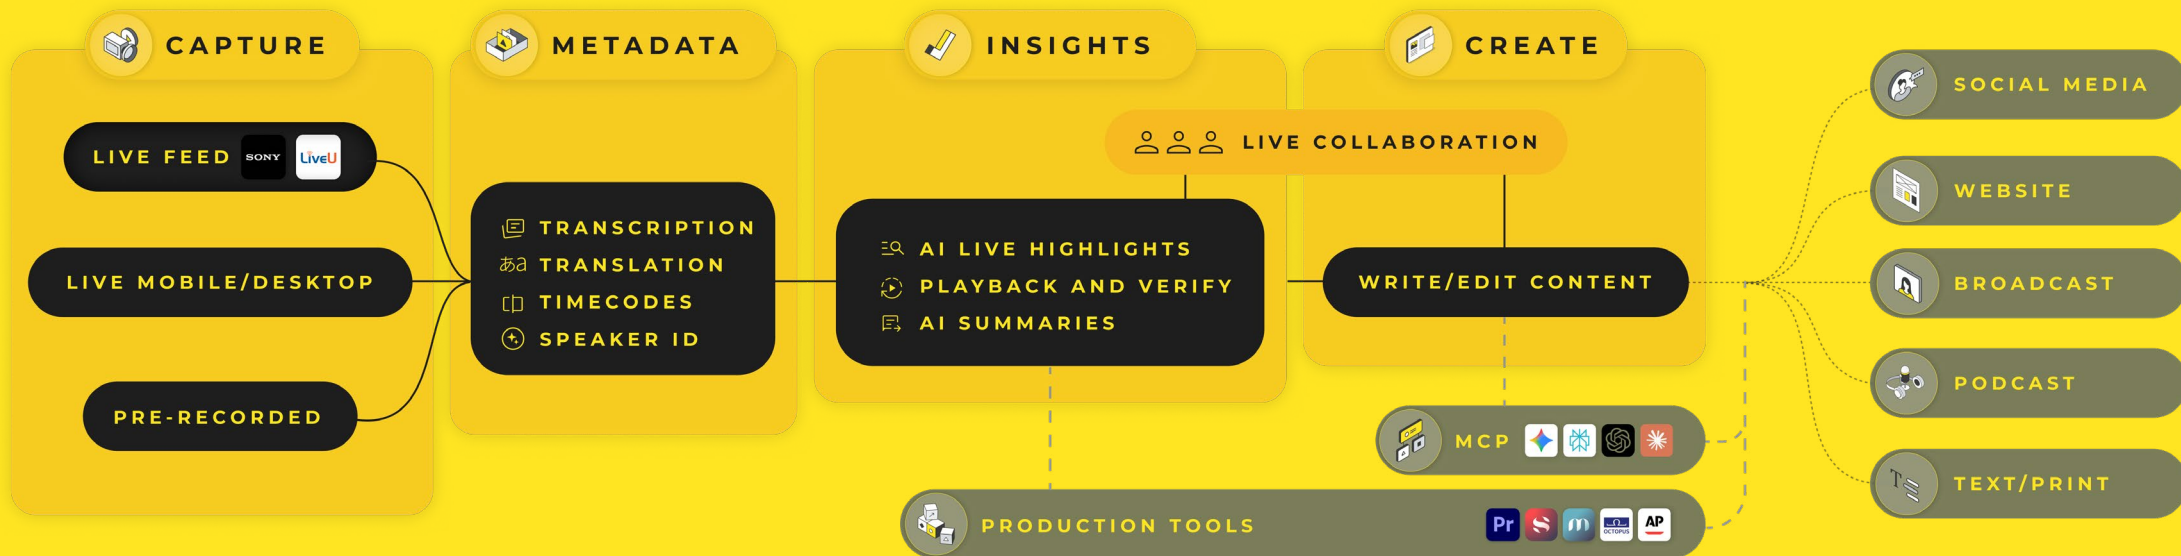

Speed-to-publishing is no longer enough. In a world of misinformation, verifying your content FIRST is what matters most.

Trint is much more than a transcription tool. Our platform accelerates every stage of your content workflow, turning raw audio and video (live or prerecorded) into searchable, shareable and verified metadata – ready to publish within seconds or minutes.

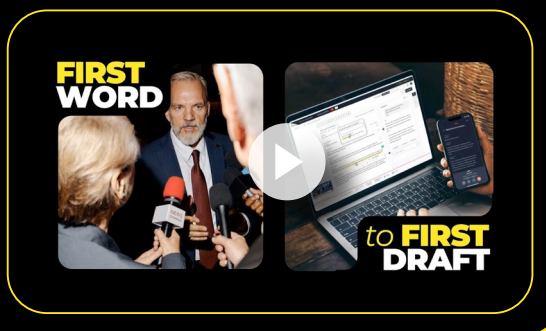

A.I. Connected Media Production

Live from the Field

Field reporters and journalists reporting anywhere in the world can live stream from camera straight to Trint capturing interviews in 40+ languages and even multi-lingual events. With Trint Live on desktop and mobile apps, realtime collaboration means newsrooms receive every word as it's spoken, ready to

broadcast. Videographers can synchronize their camera's hardware with live transcriptions and translations in one workflow, capturing every moment as it happens. Our technical integrations with Sony and LiveU help you deliver ground-breaking news even faster with RTMP and SRT broadcast compatibility.

Mike Richards
00:33:36

Good morning and welcome to our Global Morning Report. I'm Mike reporting live from the White House where right behind me you can see one of the city's most beloved community gardens in full bloom.

☐

Hana Tankana
00:33:46

ありがとう、ヨハン。おはようございます。私は今、東京の渋谷区にある 屋上コミュニティガーデンからお伝えしています。

☐

Johan Lewis
00:34:05

Gracias, Mike. Buenos días a todos. Estoy aquí en el Parque del Retiro de Madrid, donde esta mañana se ha inaugurado oficialmente el nuevo huerto comunitario urbano del distrito. Más de doscientas familias del barrio participaron en su creación durante los últimos seis meses.

☐

Hana Tanaka
00:34:25

このビルの屋上では、地域の住民たちが集まり、トマトやハーブ、季節の野菜を育てています。東京都は来年度までに、都内五十か所以上に同様の屋上農園を設置する計画を発表しました。

☒

Mike Richards
00:35:17

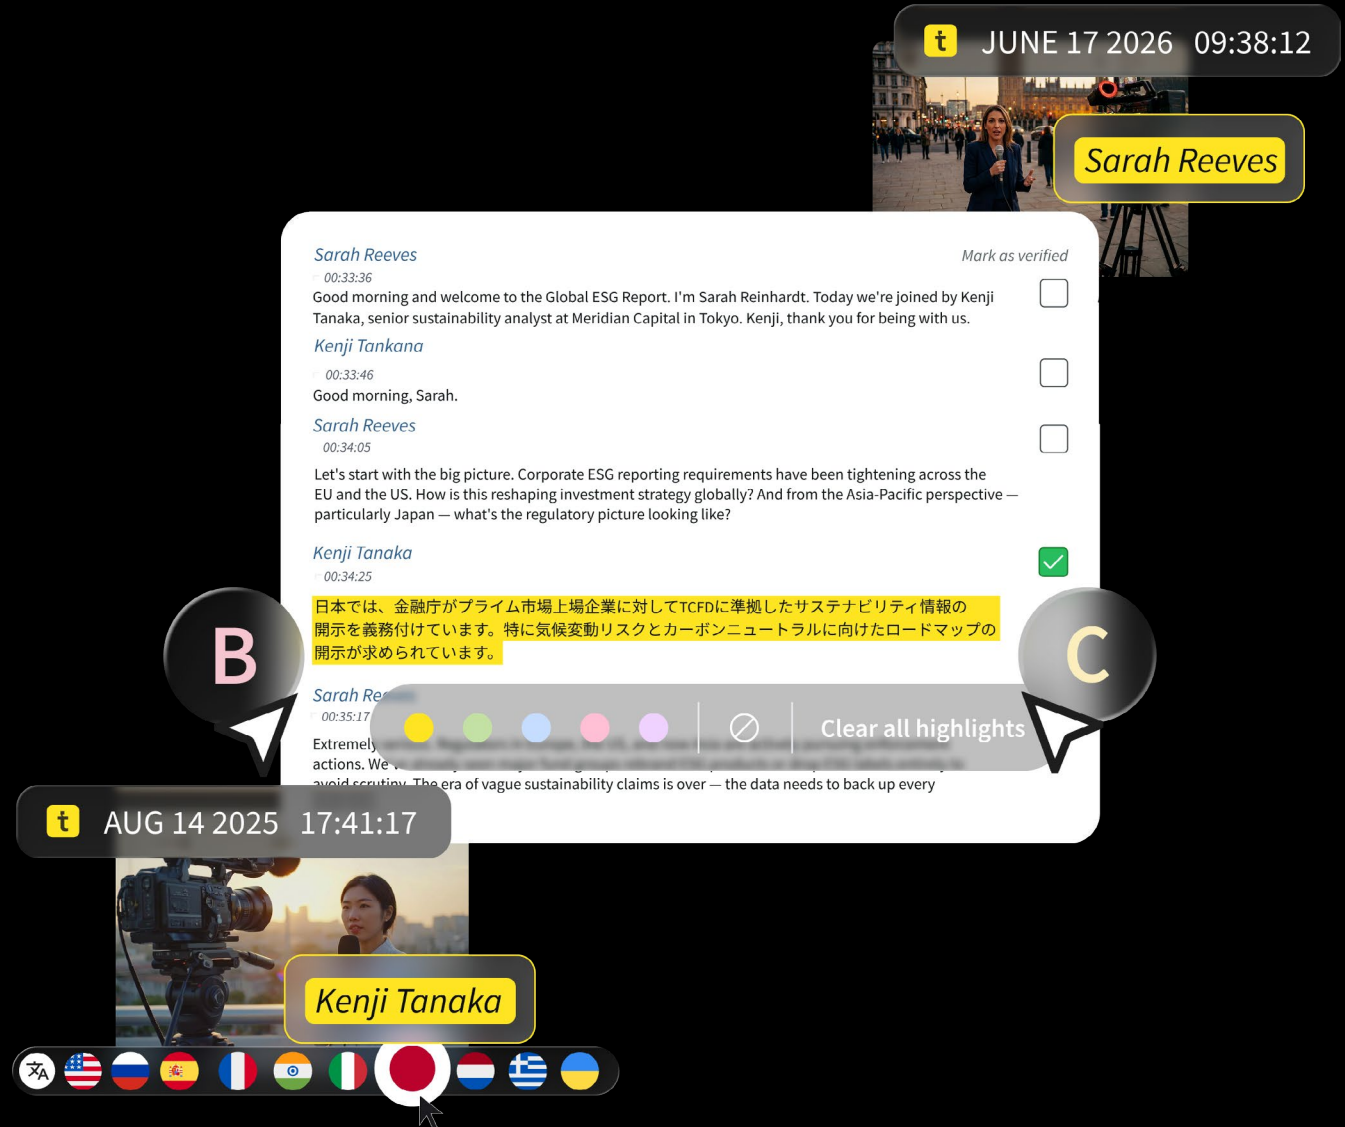

Thank you both — what a wonderful picture that paints across three continents. What's striking is how consistent the story is, whether you're in New York, Madrid, or Tokyo

☐

Using Prerecorded Content

Upload multiple audio or video files, in 40+ languages, direct to a Shared Drive that your whole team can access and edit on Trint's web, desktop and mobile apps.

Transcribe entire media archives with **BulkScribe** and transform old audio/video into premium, revenue generating content. **Search for key moments in seconds**, surfacing quotes ready to bring extra value to forgotten content.

Kenji Tanaka

Mark as verified

00:33:36 Good morning and welcome to the Global ESG Report. I'm Sarah Reinhardt. Today we're joined by Kenji Tanaka, senior sustainability analyst at Meridian Capital in Tokyo. Kenji, thank you for being with us.

Kenji Tanaka

00:33:46 Good morning, Sarah.

Sarah Reeves

00:34:05 Let's start with the big picture. Corporate ESG reporting requirements have been tightening across the EU and the US. How is this reshaping investment strategy globally? And from the Asia-Pacific perspective — particularly Japan — what's the regulatory picture looking like?

Kenji Tanaka

00:34:25 日本では、金融庁がプライム市場上場企業に対してTCFDに準拠したサステナビリティ情報の開示を義務付けています。特に気候変動リスクとカーボンニュートラルに向けたロードマップの開示が求められています。

Sarah Reeves

00:35:17 Extremely actions. We avoid scrutiny. The era of vague sustainability claims is over — the data needs to back up every

Gathering Metadata

Trint adds valuable transcription and language metadata for your media team. Automatic Speaker Recognition ensures the user always knows who is speaking and when. Time Codes are automatically added, giving user's start and end times and the precise length of a highlighted quote.

When localising content, translate transcripts into 70+ languages from any device – making creating closed captions for global audiences simple and accessible.

Dr. Whitfield

Mr. Adeyemi

Speaker 1

Dr. Whitfield:
00:33:36
Thank you for the opportunity to testify today. I want to start by noting that the funding gaps we're discussing aren't new — they've been compounding for over a decade.

Mr. Adeyemi:
00:33:46
If I can add to that, in my experience implementing these programs at the state level, the core issue is predictability. Agencies plan around budget uncertainty instead of actual need. Give them a five-year horizon, not a one-year appropriation.

Speaker 1:
00:34:05
I'd agree, and I'd push it further. Rural communities are often left out of this conversation entirely because the dollar amounts look small next to urban projects. But proportionally, the impact is just as significant.

Dr. Whitfield:
00:34:25
That's consistent with what our data shows. Rural infrastructure investment per capita has actually declined over the past ten years, even as overall federal spending increased.

Mr. Adeyemi:
00:35:17

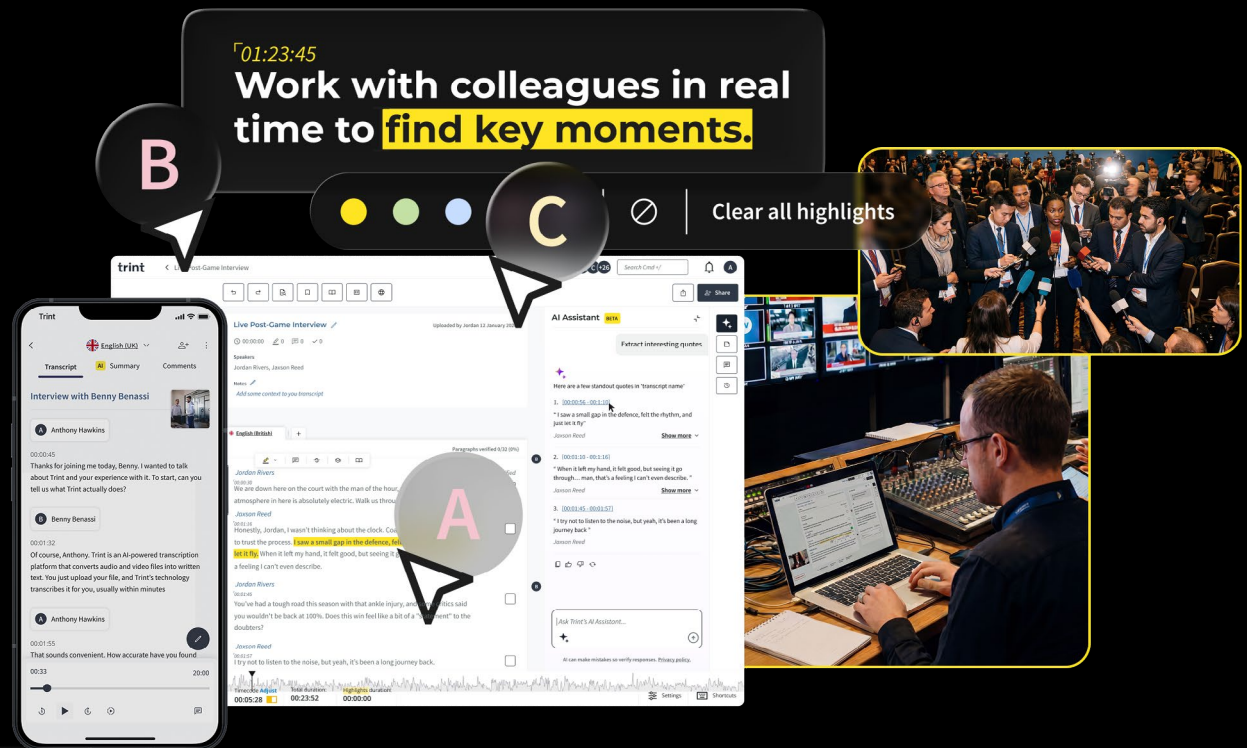

We think this is Mr Sorensen? Confirm Someone else

Collaborating on Content

Newsroom teams can collaborate live on transcripts anywhere in the world. Multiple users can work from the same transcript using [Trint's desktop or mobile apps](#) to play back and verify quotes across multiple files as they happen.

Make use of the [commenting and highlighting](#) features to help you agree on the story you want to build out and help you produce content-rich metadata at scale.

Sourcing the Insights

Trint's A.I. automatically suggests key quotes as speakers are speaking as they happen, including reasoning behind the choice and timecodes for each highlight. These can then be verified instantly and the timecode selections in the collaboration tools used to build draft content.

Use live playback to rewind and verify, before editing the text directly within the transcript. Prompt Trint's AI to find key quotes or summarize your content, saving time and making it easier for colleagues to get real value from transcripts.

Breaking News - Croatia Interview

Uploaded by @JamesHoward [12] [04] [2026]

00:51:35 11 28 54

Speakers
David White, Croatia Minister, James McCarthy

David White:
00:33:36
Good evening. Croatia is tonight in the grip of what security officials are calling an unprecedented campaign of mass disruption.

Croatia Minister:
00:33:46
...clear with the Croatian people and with international viewers, there is no explosive threat to any location at this time.

...media have described this as a possible hybrid attack, an organised operation of digital copycat behaviour

...aligns with what our intelligence services are telling us, yes. The scale, the threats are arriving through digital channels in waves, targeting simultaneously across multiple cities.

...also have our correspondent standing by at Split Airport, which was evacuated since in the 48 hours.

Drafting your story

Use [Story Builder](#) within Trint to export your metadata and draft into an article. Or combine your chosen quotes to build into a video or podcast rough cut, ready to export as an EDL.

If your team is using Claude, Gemini or other LLMs in your workflow, the [Trint MCP Connector](#) can support searching your files, finding key quotes and getting you ready to draft up the content. Within the MCP, you can also use [specific skills](#) to turn those key moments into article drafts or podcast outlines – or any output you're after.

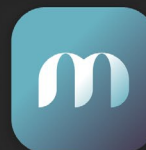

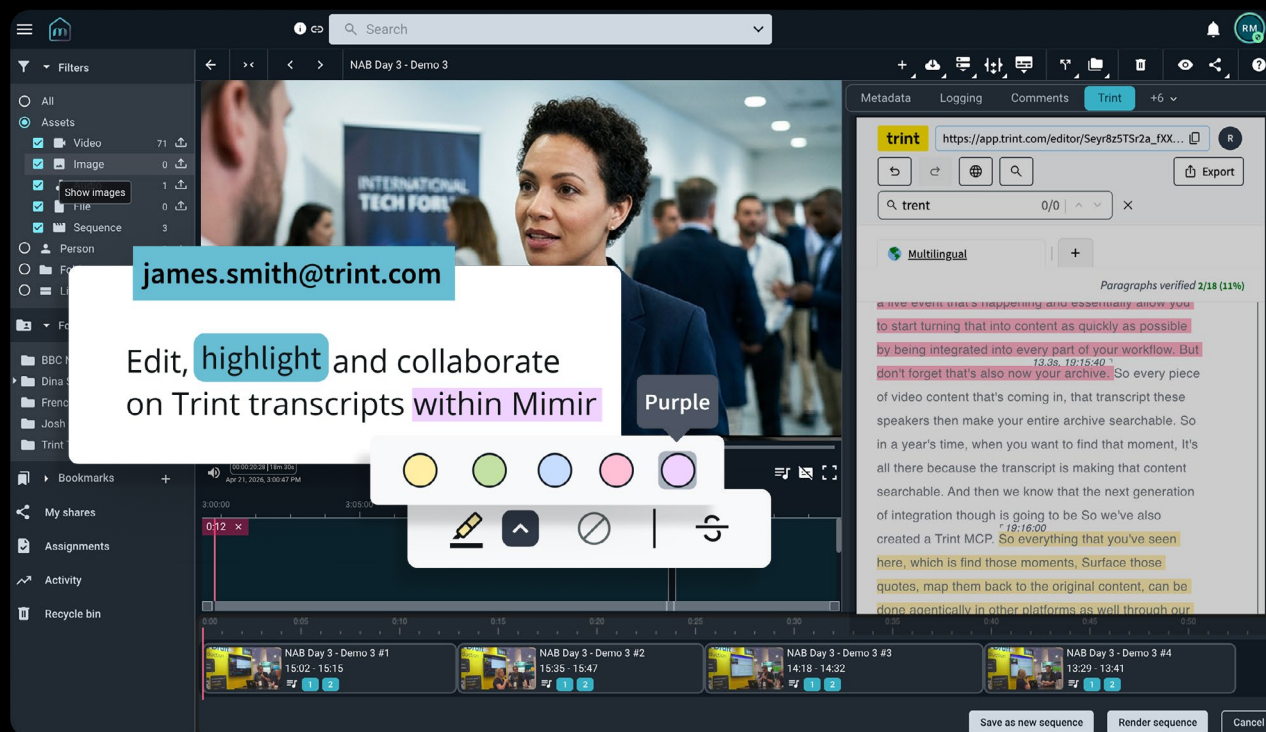

Seamless MAM Integrations

Trint isn't another isolated tool in your workflow; it's a connector. Broadcast engineers can use seamless integrations to bring Trint transcription into major MAM's, "NRCS" tools and edit software. Take Trint highlights from transcript to timeline and build stories ready for broadcast.

Your media management teams can also use our secure API to custom-build Trint into your proprietary platforms, ensuring your metadata and media stay synced through your entire content production workflow.

AI You Can Trust

Your finished content all wrapped up, verified and ready to be published.
A.I.-powered but created with the human touch at every step.

Unlike other AI models, Trint NEVER trains on your data or adds meeting chatbots without permission.

Collaborate across devices with granular access controls.

Your choice of US or EU data storage to meet your compliance requirements.

Trint is ISO 27001 certified, offering military-grade security.
